

BUNDLES

PASTURE BUNDLE #2

CONSERVATION STEWARDSHIP PROGRAM

B000PST2	Pasture Bundle#2	Addresses soil quality degradation, water quality degradation, and degraded plant condition plus an option on fish/wildlife inadequate habitat
<i>Code</i>	<i>Enhancement Name</i>	<i>Description</i>
DO ALL ENHANCMENTS IN THIS GROUP		
E512106Z2	Forage plantings that can help increase organic matter in depleted soils	Establishing adapted and/or compatible species, varieties, or cultivars of herbaceous species suitable for pasture, hay, or biomass production that can help improve soil quality of depleted sites through increase or conservation of the organic matter in the soil.
E528126Z	Prescribed grazing on pastureland that maintains/improves riparian and watershed function through minimizing sediment in surface water.	Grazing management employed will provide cover and density needed in the watershed in order to reduce runoff, improve infiltration, provide for above ground water filtration and sustain applicable fish and wildlife species habitat.
E315132Z	Herbaceous weed control that helps create desired plant communities and habitats consistent with the ecological site.	Mechanical, chemical, or biological, herbaceous weed control will be employed to control targeted, herbaceous weeds so as to create, release, or restore desired plant communities that are consistent with achievable, ecological site, steady state descriptions.
